

Legal Contract Review using Multi-Agent AI System

Project Overview

Develop a Multi-Agent AI system that automates the review and analysis of legal contracts. The system assists legal teams by extracting key clauses, identifying risks, validating compliance, comparing against standard templates, and generating review recommendations, while ensuring human oversight for final approval.

Key Requirements

1. Ingest contracts in multiple formats (PDF, Word, scanned documents).
2. Extract and classify legal clauses automatically.
3. Identify key contractual obligations, rights, and liabilities.
4. Detect missing, ambiguous, or non-standard clauses.
5. Compare contract terms against approved legal templates.
6. Identify financial, operational, and legal risks.
7. Validate compliance with regulatory and corporate policies.
8. Highlight deviations from standard contract language.
9. Analyze renewal, termination, and indemnification clauses.
10. Generate risk scores and contract summaries.
11. Recommend revisions and negotiation points.
12. Maintain full auditability of contract reviews.
13. Support human legal review and approval workflows.
14. Generate executive summaries and redlined recommendations.
15. Reduce contract review turnaround time while improving consistency.

Multi-Agent Architecture

1. Contract Intake Agent

Activities

- Receive and classify contracts.
- Identify contract type (MSA, NDA, SOW, Vendor Agreement, Employment Agreement).
- Extract metadata and document structure.

2. Clause Extraction Agent

Activities

- Extract legal clauses.
- Categorize clauses by type.
- Identify obligations, rights, and responsibilities.

3. Compliance Review Agent

Activities

- Check regulatory compliance requirements.
- Validate adherence to corporate legal standards.
- Flag non-compliant language.

4. Risk Assessment Agent

Activities

- Analyze liability exposure.
- Identify unfavorable terms.
- Generate contract risk scores.
- Highlight high-risk provisions.

5. Template Comparison Agent

Activities

- Compare contract against approved templates.
- Identify deviations and omissions.
- Recommend standard clause replacements.

6. Financial Terms Agent

Activities

- Review pricing and payment terms.
- Validate penalties and service credits.
- Analyze financial commitments and obligations.

7. Negotiation Advisor Agent

Activities

- Suggest negotiation points.
- Recommend alternative clauses.
- Prioritize items requiring legal attention.

8. Summary & Reporting Agent

Activities

- Generate executive summaries.
- Produce clause-level analysis reports.
- Create risk dashboards and review reports.

9. Orchestrator Agent

Activities

- Coordinate review workflow across agents.
- Consolidate findings and recommendations.
- Route contracts for human legal approval.
- Maintain review audit trails.

Expected Outcomes

- 50–70% reduction in contract review effort.
- Faster contract turnaround times.
- Improved legal compliance and governance.
- Early identification of contractual risks.
- Consistent application of legal standards.
- Enhanced negotiation effectiveness.
- Better visibility into contractual obligations and exposures.
